- Quantity
- Copper UNS No.

UNS No.	C10100	C10200	C10300	C11000	C12000
Former	OFE	OF		ETP	DLP

UNS Numbers below will require an amount of silver in ounces per ton when made the alloy of record.

UNS No.	C10400	C10500	C10700	C11300	C11400	C11600
Former		OFS			STP	

Other alloys may be agreed upon at time of quotation.

- Temper
 - Materials shall be finished by such cold-worked and annealing operations as are necessary to produce the required temper, edge and surface finish. The standard temper designations are:

Standard	H04	O60
Former	Hard ¹	Soft Annealed

- Edge Contours: Angles, Square Corners, Rounded Corners, Rounded Edges, Full Rounded Edges, Shapes.
- Dimensions: Thickness, Width, Length, and Weight.
- Special Testing: If required.
- Special Packaging: If required.
- Certification, If required.
- Mill Test Report, If required.
- ASTM designation and year of issue.
- Resistivity Test (ASTM B 193), If required.
- Embrittlement Test (ASTM B 577) should be requested on alloys UNS C10100, C10200, C10300, C10400, C10500, C10700 and C12000 according to procedure B of test method ASTM B 577
- If materials are being supplied for U.S. Governmental Agency, the following supplemental requirements may be made a requirement at the time of quotation.
 - Federal Standards*
 - Fed. Std. No. 102, - Fed. Std. No. 123, Fed. Std. No. 185
 - Military Standards*
 - MIL-STD-105, - MIL-STD-129
 - Military Specification*
 - MIL-C-3993
- J.I.T (Just-In-Time) stocking program available.
- Custom fabrication also available, once profile has been determined and produced, please inquire.
