

## Copper Sheet, Strip, Plate, and Rolled Bar ( ASTM B 152 )

Specialty Metals provides copper sheet, strip, plate and bar materials to O.E.M. manufacturers in the Western United States. Made to ASTM B 152 & (B248 or B272 Depending on your application), we can provide several copper alloys which would meet your requirements.

### Ordering Information

- Quantity
- Copper UNS No.

UNS No.	C10100	C10200	C10300	C10800	C11000	C12000	C12200	C12500	C14200	C14420
Former	OFE	OF			ETP	DLP	DHP	FRTP	DPA	

*UNS Numbers below will require an amount of silver in ounces per ton when made the alloy of record.*

UNS No.	C10400	C10500	C10700	C11300	C11400	C11600	C12300
Former	OFS			STP			DPS

- Temper
  - Rolled Material (Cold)(H), The standard temper designations are:

Standard	H00	H01	H02	H03	H04	H06	H08	H10
Former	1/8 Hard	1/4 Hard	1/2 Hard <sup>1</sup>	3/4 Hard <sup>1</sup>	Hard <sup>1</sup>	Extra Hard <sup>1</sup>	Spring <sup>1</sup>	Extra-Spring <sup>1</sup>

- Special or Nonstandard tempers are subject to negotiation.
- Hot-Rolled sheet and plate shall be produced to (M20).
- Annealed material from Hot Rolled product to (O25).
- Cold-Rolled annealed copper sheet and strip are designated as O60 (Soft anneal) and deep drawing anneal as OS025.
- Dimensions: Thickness, Width, and Weight.
- Type of edge, if required: Slit, Sheared, Sawed, Squared Edges, Round Corners, Rounded Edges or Full-Rounded Edges.
- Receptivity Testing: If required, when ordering alloys UNS C10100, 10200, 10300, 11000 or 12000.
- Embitterment Test.
- Furnished in Straight Lengths or Coils.
  - If Coils, Coil Weight, Coil Size, and or any Coil Size Limitations.
- Length
- Certification and or Mill Test Reports, If required.
- If materials are being supplied for U.S. Governmental Agency, are supplemental requirements of ASTM B 248 required?

<sup>1</sup> Commonly supplied only as strip. Please consult if using this temper for sheet, plate or rolled bar.
